Notes to the Consolidated Financial Statements

Three months ended September 30, 2010

Unaudited – Prepared by Management

1. Organization and Basis of Presentation

Consolidation

These audited consolidated financial statements include the accounts of IBC Advanced Alloys Corp. (“IBC”), and its subsidiaries. IBC and its subsidiaries are collectively referred to as the “Company”. All intercompany transactions and accounts have been eliminated upon consolidation. Except where indicated all amounts are expressed in United States dollars. The principal subsidiaries of the Company, all of which are wholly owned, at September 30, 2010 are listed below:

Entity	Location	Principal Activity
IBC US Holdings, Inc. (“IBC US”)	United States	Holding company
Freedom Alloys, Inc. (“Freedom”)	United States	Manufacturing
Nonferrous Products, Inc. (“Nonferrous”)	United States	Manufacturing
NF Industries, Inc.	United States	Holding company
Specialloy Copper Alloys LLC (“Specialloy”)	United States	Manufacturing
Beralcast [®] Corporation	United States	Manufacturing
Rare Earths Limited, LLC (“REL”)	United States	Mineral exploration

The unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in Canada (“Canadian GAAP”). They do not include all information and disclosures required for annual financial statements and therefore should be read in conjunction with the audited consolidated financial statements of the Company for the year ended June 30, 2010.

2. Nature of Operations and Ability to Continue as a Going Concern

The Company’s principal activity is the production of specialty alloy products, but it also sources and explores beryllium resource properties. The Company’s mineral property activities are in the exploration stage and it has interests in resource properties in the United States.

The recoverability of amounts shown for resource properties and related deferred exploration costs is dependent upon the discovery of economically recoverable reserves, continuation of the Company’s interest in the underlying resource claims, the ability of the Company to obtain necessary financing to complete its development and upon future profitable production or proceeds from its disposition.

At September 30, 2010, the Company had not yet achieved profitable operations, had accumulated losses of \$23,113 since inception and expects to incur further losses in the development of its business, all of which casts doubt about the Company’s ability to continue as a going concern. The Company’s ability to continue as a going concern is dependent upon its ability to generate profits from its operations to obtain financing to meet its obligations and repay its liabilities arising from normal business operations when they come due.

These financial statements have been prepared in accordance with generally accepted accounting principles applicable to a going concern, which assumes that the Company will be able to meet its obligations and continue its operations for its next fiscal year. Realization values may be substantially different from carrying values as shown and these financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern.

3. Capital Management

The Company's primary objectives, when managing its capital, are to maintain adequate levels of funding to support the manufacturing operations of the Company and to maintain corporate and administrative functions. The Company defines capital as bank loans, other long-term debt, and equity, consisting of the issued common shares, stock options, warrants and deficit. The capital structure of the Company is managed to provide sufficient funding for manufacturing, mineral exploration and other operating activities. Funds are primarily secured through a combination of equity capital raised by way of private placements and bank debt. There can be no assurances that the Company will be able to continue raising equity capital and bank debt in this manner.

The Company invests all capital that is surplus to its immediate needs in short-term, liquid and highly rated financial instruments, such as cash and other short-term deposits, which are all held with major financial institutions.

The Company's bank agreements require that it maintain a minimum net worth and certain ratios indicating debt coverage and debt-to-tangible net worth. In addition, there are limitations on dividends and capital withdrawals. Freedom was in violation of certain covenants during the year ended June 30, 2010 and in the first quarter ended September 30, 2010, and, as a result, Freedom's bank demanded repayment of the loans. Accordingly the Company has classified certain loan payable obligations as current liabilities that would otherwise be considered long-term (note 13). At September 30, 2010, the Company did not have available-for-sale or held-to maturity financial instruments.

The Company classifies its financial instruments as follows:

Held for trading, measured at fair value	<ul style="list-style-type: none">• Interest rate swaps• Cash and cash equivalents
Loans and accounts receivable, recorded at amortized cost	<ul style="list-style-type: none">• Receivables• Income taxes refundable
Financial liabilities, recorded at amortized cost	<ul style="list-style-type: none">• Lines of credit• Accounts payable and accrued liabilities• Income taxes payable• Notes payable• Loans payable

There were no changes to the Company's approach to capital management during the quarter ended September 30, 2010.

10. Goodwill

At June 30, 2010	\$	2,154
		-
At September 30, 2010	\$	2,154

The Company considered that there were no events or circumstances that more likely than not reduce the fair value of the reporting unit below its carrying amount at September 30, 2010, and therefore has not completed an interim impairment test for goodwill.

11. Lines of Credit

	September 30, 2010	June 30 2010
Line of credit with Customers Bank (maximum \$2,000) at 5.85% collateralized by substantially all of Freedom's assets.	\$ 1,930	\$ 1,930

Notes payable	3,000	3,000
	<u>\$ 5,430</u>	<u>\$ 5,480</u>

In addition to the collateral provided by the operating subsidiaries, IBC has guaranteed the loans payable to banks.

Contractual aggregate maturities required on notes and loans payable at September 30, 2010 are as follows:

2011	\$ 957
2012	4,473
	<u>\$ 5,430</u>

The Customers Bank and M&I bank loan agreements require that the Company maintain a minimum net worth and minimum debt coverage and debt-to-tangible net worth ratios. In addition, there are limitations on dividends and capital withdrawals. The Company has been in violation of certain of the above covenants for its banks loans. The Company has classified the long-term obligation to Customers Bank as current as the bank has demanded repayment by November 23, 2010.

As at September 30, 2010, 8,468,807 (June 30, 2010 – 8,468,807) common shares were held in escrow to be released on November 23, 2010.

15. Stock Options

In 2007, IBC's board of directors adopted a rolling stock option plan, subsequently approved by shareholders and adopted by the Company, under which the Company is authorized to grant options to directors, employees and consultants to acquire up to 10% of the issued and outstanding common stock. The exercise price of each option is based on the market price of the Company's stock for a period preceding the date of grant. The options can be granted for a maximum term of five years and vest as determined by the board of directors. The Company's shares trade in Canadian dollars and options granted to date have been denominated in Canadian funds.

In November 2009, the Company's shareholders approved a 2009 amended stock option plan at the Company's annual general meeting.

A summary of stock option activity to September 30, 2010 is as follows:

17. Interest Rate Swap

On November 3, 2008, the Company entered into an interest rate swap contract covering the period to October 15, 2011. This had the effect of converting a variable interest rate loan from M&I Bank (note 13) to one with a fixed interest rate. The interest rate swap contract provides for monthly settlements from November 15, 2008 to October 15, 2011. Pursuant to the interest rate swap agreement, the Company will receive interest at the one-month LIBOR and will pay interest at a rate of 3.3%. The notional amount of the swap at September 30, 2010 is \$1,537. The fair value of the interest rate swap at September 30, 2010 is \$49 (June 30, 2010 - \$54).

The Company has not designated the interest rate swap contracts as a hedge in accordance with CICA Handbook Section 3865, "Hedges". Accordingly, the Company accounted for the interest rate swaps as derivative financial instruments and recorded the fair value of the interest rate swaps on its balance sheet at year-end, with realized and unrealized gains as losses from the change in fair value being recorded in the consolidated statements of operations.

21. Segment Reporting

As at September 2010, the Company had three reportable segments: manufacturing, mineral properties and corporate. The manufacturing segment produces beryllium copper and other specialty alloy products; the mineral properties segment manages the acquisition, exploration and development of beryllium natural resources and analysis of the Company's resource information database; corporate oversees and administers the operating divisions and undertakes research and development.

The accounting policies of the segments are the same as described in note 3 of the Company's June 30, 2010 audited financial statements. IBC's management evaluates performance based on profit or loss from operations before other items.

22. Financial Risk Management

The Company's activities expose it to a variety of financial risks, including foreign exchange risk, interest rate risk, commodity price risk, credit risk and liquidity risk. From time to time, the Company may use foreign exchange contracts, commodity price contracts and interest rate swaps to manage exposure to fluctuations in foreign exchange, metal prices and interest rates. The Company does not have a practice of trading derivatives. In the past, the Company's use of derivatives was limited to specific programs to manage fluctuations in foreign exchange risk, which are subject to the oversight of the board of directors.

Fair Values

Financial instruments classified use level 1 quoted prices in active markets including cash and cash equivalents and interest rate swaps.

Foreign Exchange Risk

The Company operates projects in several different countries and therefore, foreign exchange risk exposures arise from transactions denominated in foreign currencies. Foreign exchange risk arises primarily with respect to the US dollar, as the majority of the Company's debt and capital expenses are denominated in US dollars. The risk is for the amount denominated in Canadian dollars since the Company treats US dollars as the functional currency.

As at September 30, 2010, with other variables unchanged, a 1% increase (decrease) in the Canadian dollar would increase (decrease) net earnings by approximately \$1.

Exposure to the Canadian dollar on financial instruments is as follows:

Balance at September 30, 2010	Canadian Dollars
Cash and cash equivalents	37
Receivables	1
Accounts payable	-

Balance at June 30, 2010	Canadian Dollars
Cash and cash equivalents	187
Receivables	20
Accounts payable	-

22. Financial Risk Management (continued)

Interest Rate Risk

The Company's interest rate risk mainly arises from the interest rate impact on cash and cash equivalents. Cash and cash equivalents receive interest based on market interest rates. The Company's long-term debt has a fixed interest rate or is hedged and is not exposed to interest rate risk.

As at September 30, 2010, with other variables unchanged, a 1% increase (decrease) in the interest rate would increase (decrease) net earnings by approximately \$2.

Commodity Price Risk

The Company's profitability and long-term viability will depend, in large part, on the market price of copper, aluminum and beryllium. The market prices for metals can be volatile and are affected by numerous factors beyond the Company's control, including: global or regional consumption patterns; the supply of, and demand for, these metals; speculative activities; the availability and costs of metal substitutes; expectations for inflation; and political and economic conditions, including interest rates and currency values. The Company cannot predict the effect of these factors on metal prices.

Credit Risk

Credit risk arises from the non-performance by counterparties of contractual financial obligations. The Company's credit risk arises primarily with respect to its trade accounts receivable.

The Company manages credit risk by trading with recognized creditworthy third parties. In addition, receivable balances are monitored on an ongoing basis with the result that the Company's exposure to bad debt is not significant.

The Company also manages its credit risk by investing only in obligations of any province of Canada, Canada or the United States or their respective agencies, obligations of enterprises sponsored by any of the above governments; banker's acceptances purchased in the secondary market and having received the highest credit rating from a recognized rating agency in Canada or the United States, with a term of less than 180 days; and bank term deposits and bearer deposit notes, with a term of less than 180 days.

The Company's maximum exposure to credit risk at the reporting date is the carrying value of cash and cash equivalents, and other receivables.

Liquidity Risk

The Company manages liquidity risk by maintaining adequate cash and cash equivalent balances. If necessary, it may raise funds through the issuance of debt, equity, or monetization of non-core assets. To ensure that there is sufficient capital to meet obligations, the Company continuously monitors and reviews actual and forecasted cash flows and matches the maturity profile of financial assets to development, capital and operating needs.

See note 13 for contractual undiscounted cash flow requirements for loans and notes payable as at September 30, 2010.
